

Save Time: Document with the TA⁺ Software Bundle

Finally, the Efficiency and Convenience Dictators Need
For Physician Practices, Mental Health and Hospital Providers

The TA⁺ Software Bundle includes all 3 products

With the Mobile+ App Providers:

- Dictate on their smartphone
- View patient daily lists on their smartphone
- View transcripts on their smart phone or tablet
- E-sign on their smart phone or tablet
- Use Apple and/or Android devices
- Use Dragon's speech rec to have draft text files created from mobile dictations
- Know that all data, voice and text files are encrypted and secure

Industry-Leading Speech Recognition:

- Amazing accuracy from first dictations
- No voice training needed
- Dragon correctly translates dictated notes into text instantly
- Dragon correctly translates commands for punctuation, fonts and headings instantly
- All medical specialties supported
- All accents and nationalities supported
- From Nuance

Speak-EZ+ Turbocharges Dragon for Extra Features

- Send a job to a transcription team for editing
- E-sign within Speak-EZ+ on the same screen
- Insert Normals from a list
- Save an incomplete job and resume later
- Three spellcheckers for accuracy when editing
- HIPAA event log tracking of access to each dictation
- Voice file storage for 45 days

All for the Introductory Price of \$1,599.99
What is Your Time Worth? ROI in under 2 Weeks!

Yes, With the TA⁺ Software Bundle Dictators can:

- Have more time for family
- See more patients during the day
- Dictate on a smart phone and review the draft transcript on a desktop minutes or hours later

- Work from multiple workstations, office and home, with a single license
- Eliminate waiting for transcribed reports
- Listen to voice files weeks after recording
- Sign transcripts right after dictating and editing, on the same screen

- Review transcripts online months later
- Dictate while traveling between appointments and review draft transcripts later that day
- Create templates of common worktypes
- Automate delivery to other providers

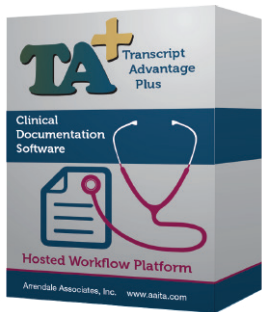

Would TA+ Clinical Documentation Help your Facility?

TA+ Bundle users may benefit from the all encompassing, hosted TA+, Transcript AdvantagePlus, clinical documentation platform in addition to the Bundle and their EHR. TA+ software includes:

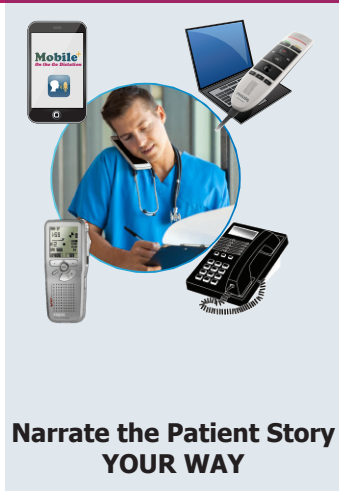

- Options to dictate with toll free landline phones and digital recorders in addition to mobile devices and mikes
- A 12 month (or longer) transcript repository
- Integrated document creation and QA software with Dragon compatibility
- E-signature: On Internet based PCs, smart phones and tablets
- Online transcript delivery by folder drop, FTP and HL7
- Transcript body keyword search function for meds, symptoms and treatments
- Automated print and fax: batch and immediate, local and physician offices
- Unlimited user licenses for dictators, transcriptionists and support teams
- Built-in management reports for dictation, transcription and turnaround times
- Secure remote hosting at a leading, certified data center
- US based Support Center, 24 by 7, weekends and holidays included
- Overflow transcription outsourcing integration for weekends and nights by A+Network US MTs

Harmonize your providers and administrators when dictators have the freedom to narrate and document each with his/her chosen method. Integrated HIPAA event tracking lists every access to a voice file or transcript to protect your patients' PHI. Support teams and MTs become more efficient with integrated, easy to search software. Administrators love the cost savings over other systems.

One System: Flexibility, Efficiency and Harmony

**With the Hosted
Workflow Platform**

**Narrate the Patient Story
YOUR WAY**

**Convert to Text
YOUR WAY**

**Deliver & Track Securely
YOUR WAY**

About Arrendale Associates, Inc.

Arrendale Associates has supplied cloud-based clinical documentation software products and services to enhance physician productivity since 2002. Arrendale's custom workflow and engineered solutions for dictation, transcription, electronic signature and interoperability compliment Dragon Medical Edition speech recognition software for provider efficiency. Hospitals, clinics, single providers and transcription service organizations worldwide benefit from Arrendale's, TA+, flagship platform by reducing costs, expediting patient documentation and enhancing provider satisfaction. Integrated smart phone applications deliver the convenience providers require to document in their offices, while in transit and from remote locations. Arrendale provides US-based integrated transcription service outsourcing through its subsidiary, A+Network, LLC.
