

# TransNet<sup>Solo</sup>

TransNet Solo is a standalone clinical documentation solution created specifically for smaller healthcare providers and facilities. The software product has been engineered for ease of use, HIPAA-enablement and efficiency. TransNet Solo contains a word processor, abbreviation expanders and spellcheckers, eliminating third party software expenses. With TransNet Solo providers may self document (transcribe) or they may dictate, creating compatible audio files for document creation by a transcriptionist or a blend of both methods.

## Word Processing Features and Benefits

- TransNet Solo's word processor integrates specialized medical, pharmaceutical and general spellcheckers for accuracy
- A customized toolbar depicts standard functions and additional keyboard commands to increase productivity
- TransNet Solo has the look and feel of MS Word for quick start-up but uses an RTF (rich text format) file type for compatibility with other programs
- When transcribing with dictated audio, total dictation length and time remaining for current job are displayed on the media bar in the application for time management
- When submitting a completed job, TransNet Solo automatically:
  - 1) Runs general, medical and pharmaceutical spellcheckers,
  - 2) Saves the completed report
  - 3) Uniquely names the report
  - 4) Initiates next job
- TransNet Solo may be used with or without an import of patient data to auto-fill template fields
  - Patient data from scheduling systems may be imported into TransNet Solo via an automated csv spreadsheet process
  - Productivity and accuracy are improved with the import of patient data
- Functions are keyboard or mouse driven for convenience

## Abbreviation Expander and Template Efficiency

- TransNet Solo includes an integrated abbreviation expander with 1200 optional pre-programmed abbreviations and associated text expansions
- Abbreviations are 1-3 letters or numbers and corresponding expansions may include words, phrases and even paragraphs
- New abbreviations and associated expansions are easily added
- Spacebar, Tab Key, Enter key or punctuation keys activate replacement feature to insert text
  - TransNet Solo includes a blank template and users may create additional templates
  - New templates are created, named and uploaded quickly, saving time and effort
- Templates may contain logos, various fonts and numbered lists
- A single keystroke (@) advances the cursor to any designated field in the template to reduce keystrokes
- 2G PC requirement allows for multiple templates and thousands of text expanders

## Workflow Functionality with TransNet Solo

- TransNet Solo may be used with or without dictated audio
  - TransNet Solo accepts audio from **wav** files and digital voice recorders using the industry-standard **dss** file format from your PC directory
- When completed, transcripts will be saved on the PC as RTF files and stored in a specified folder
- Transcripts may be automatically emailed upon completion
- Transcripts may be sent to a secure FTP site
- Transcripts may be copied and pasted into other applications such as electronic health record systems

## Security and Privacy with TransNet Solo

- TransNet Solo requires a complex password during log in, unlike MS Word
  - Passwords must contain alpha, numeric, special and capitalized characters
- Transcripts, patient data and templates are encrypted within TransNet Solo when stored on a PC

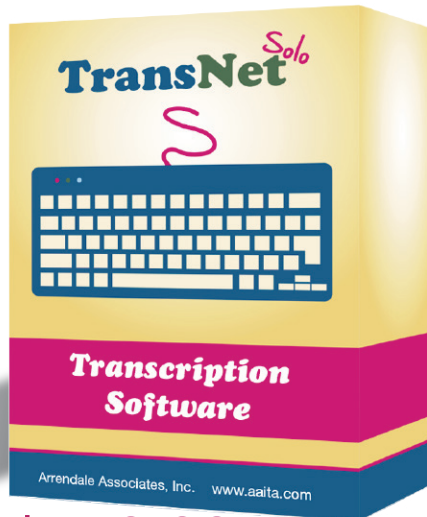

INTRODUCING

# TransNet<sup>Solo</sup>

## Single User Transcription Software

Perfect for small physician offices and mental health providers

- Speed typing with built in abbreviation expander
- 1,200 initial abbreviations and replacements included
- Medical, pharmaceutical and standard spellcheckers
- Template driven including fonts, logos and numbered lists
- MS Word look and feel for fast startup
- Import option for patient data via a csv spreadsheet from your EHR or PMS
- Media player display of audio progress

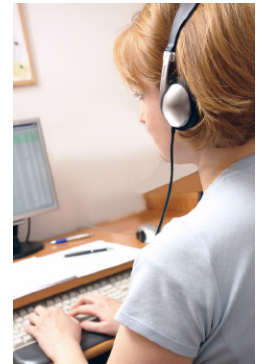

- Encryption for HIPAA
- Separate login and complex password protects patients
- Accepts audio from wav files and digital voice recorders from your PC directory
- E-mail or ftp distribution
- Improves office productivity
- Use with or without audio
- Both American and British date, time and spelling formats included

**\$149.99**

## Why TransNet Solo instead of transcribing with MS Word

- Integrated abbreviation expander averages 30 percent higher productivity
  - Other abbreviation expanders retail for \$150 or more
- Built-in medical and pharmaceutical spellcheckers
  - Other spellcheckers retail for \$170 or more
- Transcribed reports are protected on a PC with TransNet Solo's encryption and complex password
- TransNet Solo's template system saves time and streamlines workflow
- Visible display of audio length and progress helps budget time
- Unique job number assigned to each transcript organizes transcripts
- TransNet Solo is way less expensive than MS Word

## 35% Discounts for Students and Educational Facilities

### PC and Ancillary Requirements

**Operating System:** Windows 7 and above  
**CPU:** 1.4+ GHz  
**RAM:** 2+ GB Available  
**Disk:** 10+ GB Available  
**Screen Resolution:** 1024x768

Windows product, not compatible with Mac computers  
Simple download installation  
Compatible with USB Footpedals and USB headsets
