

Create Better Notes in Less Time

Arrendale Solutions for Behavioral Health

Dictation with Integrated Cloud Speech Recognition

- Speech-to-text efficiency is 3-4 times faster than typing
- Compatibility with all EHRs, major and behavioral health, without special integration
- Better, more detailed client notes accomplished in less time
- Less EHR click fatigue: Simple voice commands
 - Activate shortcuts
 - Navigate screens
 - Populate information fields
 - Insert long, multi-sentence text
- Dictation options and devices suit every psychiatrist, clinician and counselor
- Speech workflow improves billing and shortens reimbursement cycle
- Scalable system is adaptable for single clinicians to thousands
- Individually tailored initial assessments, treatment plans and progress notes for your facility
- Improved consistency and accuracy of notes benefits patients and care givers

Arrendale **Instant Mobile Notes** creates a note in minutes with your smart phone no matter where your day takes you: Secondary campus locations, client homes, your home office

Arrendale's desktop **Speak-EZ** program displays your note as you speak, within your EHR or within our app, producing a detailed, accurate narrative.

More Time for Clients; More Time for Family

- Secure, unique website for anytime, anywhere access to dictations and notes
- System requires user name and password for any access
- System permissions are assigned to each user based on that users Need to Know requirements
- All dictating, listening, editing, e-signing and delivery is logged by date, time and user ID
- Job events log is available, view and print, for each note for HIPAA concerns
- All voice, text and client data is encrypted on servers, PCs, mobile devices and in transit
- Premier data center is audited and certified yearly
